Objective

Junior MERN stack developer seeking an opportunity to utilise his skills in developing web applications to contribute to the growth and development of an organisation where he is able to grow and develop new skills in an inclusive environment

Education

DIPLOMA IN COMPUTING (BTEC)

September 2019 – June 2021

Colchester Institute | **Distinction*** Distinction

- Introduction to the world of programming using python while learning about the principles of computational thinking.
- Design and developed a 2D game using game maker to satisfy specific requirements while assessing the effect of the different game genres on a specific demographic.
- Designed, assessed, and implemented a computer network, taking into consideration risk of internal and external threats. Thereby recommending the appropriate defense strategies to keep it secured.
- Researched the impact of computing on various sectors of the economy including employment.
- Design and implementation of a drone delivery system for an existing company considering its impact on the business, the environment as well as ethical issues.
- Using project management skills and tools to determine the feasibility of a project with respect to a limited budget and a timescale.

EXPERIENCE AND PROJECTS

Full-stack web development bootcamp

HyperionDev - [Result](#)

December 2022 – March 2023

During the bootcamp, I learnt how to build full-stack web application using React.js for the frontend, Express.js to build the backend, with the backend talking to a mongo DB database.

Responsive web Design

Freecode Camp - [Result](#)

March 2021

Introduction to the fundamentals of web development using HTML, CSS and JavaScript. Learnt how to translate web designs into responsive websites using CSS flex box and adding interactivity to websites with the help of JavaScript.

Nft-demo website
[Live Demo](#) | [Source](#)

A static landing page built using HTML, CSS and JavaScript, fully responsive to a wide range to screen sizes.

Hulu website clone
[Live Demo](#) | [Source](#)

A clone version of the landing page of HULU video streaming built using HTML, CSS, and JavaScript, fully responsive to a wide range to screen sizes.

Skills

Web Technology:

HTML5, CSS3 and JavaScript, Mongo BD, React.js, Node.js

Operating System:

Mac OS, Windows

Version Control:

Git, GitHub

Other Relevant Skills:

flexibility and adaptability, focus and ambitious, problem solving and creativity, effective communicator, collaborator, tinkering and troubleshooting
